Education

Indraprastha Institute of Information Technology Delhi

2018-2022

Bachelor of Technology in Computer Science and Design (GPA: 8.35 / 10.00)

New Delhi, Delhi NCR

- **Relevant Coursework:** Machine Learning (Python), Reinforcement Learning (Python), Computer Graphics (C++), Data Structures and Algorithms (Java), Object Oriented Programming(Java), Analysis and Design of Algorithms (Java), Linear Algebra, Probability and Statistics, Network Science, Database Management (MySQL)

Experience

Oracle

November 2024 – Present

Senior Member of Technical Staff

Bengaluru, Karnataka

- Built an enterprise **natural-language data exploration platform** using MCP-based integrations, enabling engineers and executives to securely investigate incidents and cloud-service data through governed, tool-grounded queries.
- Designed a **hallucination-resistant agentic AI architecture** with deterministic tool execution, validated query generation, and reusable MCP servers, improving reliability and reducing data-discovery effort.

Walmart Global Tech

June 2022 – November 2024

Software Engineer III

Bengaluru, Karnataka

- Worked with the Data and Customer Analytics Team to architect and implement **robust ETL workflows**, ensuring seamless data integration and transformation processing **8TB data daily**.
- Played a pivotal role in identifying and implementing innovative solutions to enhance the **efficiency and scalability of ETL processes**, amplifying the **data freshness from 2 days to 2 hours** and cutting the **cloud cost by 30%**.

Space Systems Lab, IIIT Delhi

June 2021 – December 2021

Undergraduate Student Researcher

New Delhi, Delhi NCR

- Studied various concurrent algorithms and techniques used for **Precise Orbit Determination**. Developed an algorithm customized for **ISRO Megha-Tropiques satellites**, determining their precise position with an error of under **ten centimeters**.

Publications

Garg, S., Srivastava, A., Glencross, M., & Sharma, O. (2022). A study of the effects of network latency on visual task performance in video conferencing. *Extended Abstracts of the 2022 CHI Conference on Human Factors in Computing Systems (CHI EA '22)*, Article 213, 1–7. New York, NY: Association for Computing Machinery. DOI: 10.1145/3491101.3519678

Projects

Curiosity-driven Exploration by Self-supervised Prediction | Python, PyTorch, Tensor Flow

- Implemented a Curiosity-driven Exploration technique by Self-supervised Prediction which doesn't require in-depth knowledge of the domain in VizDoom game environment

Choosing Classifiers for Stable Learned Bloom Filters | Learned Data Structures, Python

- Formulated primitive guidelines for using various models in different situations for stable learned bloom filters which are a form of learned Data Structures.

Technical Skills

Languages: Python, Java, C++, SQL, Scala, HTML, CSS, Javascript, Bash

Technologies: React.js, Tailwindcss, Flask, Spring Boot, TensorFlow, PyTorch, Spark, Kafka, Google Cloud Platform, Node.js

Concepts: Computer Graphics, Artificial Intelligence, Reinforcement Learning, Machine Learning, Neural Networks, API, Agile Methodology, Cloud Computing

Awards & Achievements

- Secured first place in the Organic Traffic Hackathon in Walmart receiving \$ 5K and sponsors to build the proposed solution.
- Secured second Place in PayTM build for India Hackathon.
